This assignment deals with the measures having equivalent effect to quantitative restrictions on the free movement of goods within EU (mainly art. 34 TFEU):

Assignment question:

**‘I am of the opinion that national rules are liable to constitute a measure having an effect equivalent to a quantitative restriction, contrary to the Treaty, if they impede access for a product to the market, regardless of the aim pursued by the measure in question.’ (AG Bot in Case C-110/05 *Commission v. Italy* [2009] ECR I-519 )**

**Discuss the case-law of the CJEU on the interpretation of ‘measure has equivalent effect’ in 34 TFEU in light of this statement. Consider in particular whether the CJEU has fully embraced the market-access approach for goods and, if not, whether it should do so.**

Please take care of all the questions raised by the assignment. The discussion must address the recent case law of the CJEU, examine the recent decisions that either embrace or not embrace the market access test and finally discusses whether it should embrace it or not.

Again, the assignment must be of 600 words, the course level is LLM in EU law
