mwm My Writing Master &

**ftc** PRESENTS **face the Case**  
a case study competition

1\_Nursing\_8EA14S25

# General Guidelines

Each case will have two parts : 1 & 2

*Part 1 (1000 words)*

You need to write on “My approach to solve this case” in 1000 words. This part is to be written in sequential point wise format. Addition of graphical objects like images, charts, screenshots etc to explain your point will be favorable. It has to be written in an explanatory format as if you are teacher presenting on your approach for solving this case. The content should be originally written and not copied from any other source.

*Part 2 (1000 words)*

This part should have solution of the case written in 1000 words(excluding references) keeping the following things in mind.

1. The solution is to be in hand typed and not copy pasted word doc format. Your solution will undergo plagiarism check through “Turnitin” software. Only 5% plagiarism is allowed excluding references. Case solutions with more than 5% plagiarism will automatically be disqualified.
2. The solution should have word doc enabled “in text” (citations) and “out text” (bibliography) referencing in APA format. To know about in text/out text referencing and APA formatting click on this [link](#)
3. Formatting : Your solution should have **Automatic table of content, Word doc enabled in text and out text referencing, Cover page, Times Roman 12 Font, Double spacing paragraph spacing**. To learn on these formatting tools please check this [link](#) and check each and every link on the page which opens.
4. An academic case study should definitely focus on

- The problem at hand
- Linking the problem with theoretical concepts
- Suggesting solution/analyzing it with your own creativity and
- Concluding the case.

Please **do not write executive summary** in the solution. Please bear in mind that a case solution with relevant images, charts and logical flow are always interesting to read.

5. Once again : DO NOT MISS IN TEXT/OUT TEXT REFERENCING in your solution and it should be PLAGIARISM FREE.

Marking criteria

Apart from some specific marking criteria provided in the case study documents, your case solution will also be marked on some standard marking criteria like

- Efforts in analyzing the case,
- Creativity of ideas and linking with existing theories,
- Command on written English and
- Adherence to above mentioned formatting standards

Important Dates

Date and Time of launch : 12 December 2014, 11:00 AM IST

Last date for submission : 21 December 2014, 12 Noon IST

Announcement of results : On or before 23 December 2014 5PM IST

Dispatch of Prizes : On or before 5 JAN 2015

-----**END OF GENERAL GUIDELINES**-----

**CASE GUIDELINES** (This is a case offered to Marketing students of Nursing university in Australia)

**The aim of this assessment is to enable students to identify, critically examine and report on the effective nursing management of chronic illness in people with a functional disability across the lifespan. This will assist in better preparing the student for professional practice when working with people with a disability and chronic illness.**

**TOPIC :** Critically analyse the health effects on a person of 45 years having an intellectual disability and a chronic illness and the impact of the nurses' ability to promote the health and wellbeing of the person

**CASE HISTORY:** Students are to focus on the following case history: an **adult** man of 45 years with **Down syndrome** and a **moderate intellectual disability**. This man has diabetes - students need to select either Type 1 **OR** Type 2 Diabetes as their chronic illness – **NOT BOTH**. This man lives in a community group home that is staffed by support workers and he attends a disability-specific day program M-F. You are the community nurse managing the holistic care needs of this man.

The assessment criterion considers the following guided questions

1. What are the challenges that this man with a moderate intellectual disability and diabetes faces across his lifespan ? What are the potential impact these health challenges may have on his life and well being?
2. Using the ICF model, how is the man's activity and participation across his lifespan affected by having intellectual disability and diabetes ?
3. Identify 1 intervention / strategy for managing diabetes from the peer reviewed literature. How will you as a community nurse adapt this strategy/intervention to ensure optimum health and wellbeing across the man's lifespan ? If you selected TYPE1 diabetes- your intervention /strategy must focus on BSL and medication management. If you selected TYPE 2 diabetes your intervention / strategy should focus on physical activity and diet.
